2 years (1980/81) US\$ 185.00
Reduced subscription for individuals US\$11.00

FREE SPECIMEN COPY AVAILABLE ON REQUEST

Shipping prices for journals will be sent to UK and Eire customers on request
Prices include postage and insurance
All prices are subject to change without notice.

Founder-Editor: Frank J. Malra, Boulogne-sur-Mer, France

Aims and Scope

Leonardo is a quarterly international professional academic journal for artists, art teachers and others interested in the contemporary visual or plastic fine arts. Illustrated articles by artists are published which deal with aspects of their work, with no restrictions on artistic tendency, artistic content and medium.

Leonardo also contains articles on developments in the other arts, on new materials and techniques of possible use to artists and on subjects in aesthetics, architecture, education, the natural and social sciences and technology.

Selected texts of a special character are published in the Documents section. Also included in the Journal are the following sections: *Zoontology, International Science-Art News, Antiquities for Contemporary Artists, International Opportunities for Artists, Calendar of Events, Books and Letters*

Partial Contents of Volume 11, Number 1

K.K. SHIBUKI with S.I. CLERK: A memoir on the work of a painter in India
JOHN W. HOLLOWAY: Implementation of notions of science in some of my articles and drawings
EDVARD ZAJEC: Computer art: A binary system for producing geometrical nonfigurative pictures
EDMUND RICHIE FEEDMAN: A societal critique of art history in the U.S.A.
CHARLES G. GROSS and MARC H. BORNSTEIN: Left and right in science and art
FRANK BROWN: Computer music produced with the aid of a digital-to-analog converter
ALBERT GARRETT: Report on Color 77, Third Congress of the International Color Association (AIC)
JORGE GLUSBERG: 1977 Symposium on Video and Communication, Barcelona, Spain
PAUL HERBIE and NANCY BURBE: Inexpensive stage scenery made from materials for paper manufacture
PIERRE BOULEE: Technology and the composer
GERARD-CHARLES BUMP: The possible impact of computer ethnology on the analysis of works of art

**MONSTERS
IN THE SKY**
by Paolo Maffei

Monsters in the Sky is "extremely rewarding and could build, in the serious student, a genuine excitement centered around Maffei's authoritative analysis of the 'true anomalies' of today's known universe. Maffei's discussions progress from the enigmas presented by relatively near comets to the mysteries of astoundingly remote 'monsters' such as supernovae, runaway stars, quasars . . . An updated study of the black hole hypothesis may top anything written on the subject thus far." —*Publishers Weekly*
147 illustrations

SOLASTRA-100™

AT LAST! YOUR OWN 3-D COLOR MODEL OF THE SUN'S NEIGHBORHOOD IN A QUALITY-ENGINEERED KIT!

This easily assembled kit maps in three dimensions the 75 known star systems within 25 light years of the sun. SOLASTRA-100 features:

- Color-coded fluorescent stars suspended on nearly invisible filaments.
- Its own black-light illuminator for dazzling nighttime display.
- Rigid construction for viewing in any orientation.
- Desktop dimensions (18" x 12" x 12").

SOLASTRA-100 is perfect for astronomy club, museum, classroom, office or home display. This beautiful, educational and fascinating model is only **\$59.95 per set** (U.S.A.). Foreign orders include postage for 6 lbs. Mass. residents add 5% tax.

**This Winter
We Toured The Galaxies With
200,000 People. Soon We're Going To
Saturn, Halley's Comet, The Milky Way...**

If you've been impressed all your life with the stars that perch you in the soft or warm summer's night, you should be reading **ASTRONOMY** magazine. If you've thought you could never appreciate the "music of the spheres" you'd better try **ASTRONOMY** magazine. If the wonder and excitement of a billion spears of light seems well beyond your understanding, you should be subscribing to **ASTRONOMY**.

Month after month, with observatory-quality color photographs, lavishly captioned and crystal clear writing, **ASTRONOMY** makes the adventure of space as exciting as today's news. What was once dry-as-dust physics and mathematics become transformed into easily understood explanations of the wonders above us.

Today 200,000 readers have entered the universe of **ASTRONOMY**, the country's largest astronomy magazine. You'll find absorbing articles about galaxies - red dwarfs - oscillations of the universe - Mars - red variables - photographic astronomy - Voyager missions - rings around the planets - climate changes - star swarms - black holes - and much more.

There are popular departments such as Equipment Atlas, which delves into astronomical "tools of the trade" for amateurs; Gemini Gazette, a short course in observing each month; Sky Almanac, your guide to the sky; Star Dome, to help you explore the skies in detail; Forum, controversial and intriguing; Astro-news for late-breaking items; Astro-market for free classified ads; and a regular book review guide for further reading.

Astronomy has come of age. We've learned more about the vast spaces around us in the last 30 years than in all previous history. Young people today know more about galaxies, clusters, quasars, pulsars and mysterious black holes than the expert astronomers of 30 years ago ever dreamed about.

Become a subscriber to **ASTRONOMY** and join us in our travels through the unfolding universe. In its pages you'll find new worlds of wonders going in on one another as your knowledge and appreciation of the heavens grows greater each month.

FREE

When you send your subscription payment, we'll send you **FREE** this stunning full color NASA Space Shuttle poster. It's a giant 20x42" outsize of our first true spacecraft. We've sold hundreds at \$3.25, but it's yours **FREE** with payment!

1 YEAR \$15 **2 YEARS \$22.50**

Enclosed is my check/money order. (Because of paying now, I'll receive a free Space Shuttle poster now.)

Charge my Master Charge VISA. This qualifies me to receive a free poster now. Card # _____ Exp. Date _____
