

## North American AstroPhysical Observatory (NAAPO)

### **Cosmic Search: Issue 6** (Volume 2 Number 2; Spring (Apr., May, June) 1980)

[Letters in magazine found on page 9]

## Letters\*

By: Editors

\*Letters are always welcome but owing to the volume it is not possible to acknowledge all of them. Also due to space limitations we reserve the right where necessary to condense or edit the contents. Letters may be addressed to: Editorial Dept., **COSMIC SEARCH**, P.O. Box 293, Delaware, Ohio 43015.

I am one of your first subscribers and, like all others, look forward eagerly to each new issue. In fact I read many of the articles several times.

G. W. Drake  
Bay Village, Ohio

I subscribe to too many magazines as it is but **COSMIC SEARCH** is unusual. It is GOOD!!

Reid Martin  
Tavares, Florida

**COSMIC SEARCH** is doing a fine job of giving an overview of the work being done to explore the possibilities of communicating with possible civilizations beyond the earth. Basic to such communication is the use of the radio telescope.

I am presently building a two-dish interferometer for 610 megahertz and would be interested in exchanging technical information with other amateurs who are working on radio telescopes. I think it would be a good idea for **COSMIC SEARCH** to include an occasional nuts and bolts article for encouragement to amateurs in the field of radio astronomy.

Jerry Carmean  
Calico Ridge

Logan, Ohio 43138

SETI is one of the grandest scientific endeavors and **COSMIC SEARCH** gives it the serious treatment it deserves.

Bruce E. Fleury  
Tampa, Florida

Good luck with **COSMIC SEARCH**. It is a very worthy effort. The Winter 1980 issue is probably the best since the magazine started.

Prof. Michael D. Papagannis  
Chairman, Dept. of Astronomy  
Boston University  
Boston, Massachusetts

**COSMIC SEARCH** has excellent material and is very readable. I would enjoy a little more futurist viewpoint.

Robert E. Manion  
Columbus, Ohio

---

We hope radio astronomy buffs will write to **COSMIC SEARCH** about their work as suggested by Jerry Carmean.

Construction manuals for making your own amateur radio telescope, completely operational radio telescopes and accessories are carried by Bob's Electronics, Fort Lauderdale, Florida. In addition this organization sells a cassette tape with dramatic sounds of pulsars and other radio sources.

—Eds.

---

We hope your magazine grows and grows. It deserves much success.

Rosina Hodge  
Tarzana, California

Publishing **COSMIC SEARCH** must involve a lot of effort but please continue. It is very worth while.

Dennis Cole  
Pasadena, California

Your magazine is something for which I have waited years. Keep up the good work.

Delbert E. Anderson  
Laurelville, Ohio

An excellent magazine. I am renewing my subscription for two years.

Flemming Ahrenkel  
Horsholm, Denmark

The Fall 1979 issue was very thought provoking.

Louise Sundin  
Minneapolis, Minnesota

I find **COSMIC SEARCH** particularly useful because I can easily understand the articles.

D. Narasimhan  
Madras, India

I love **COSMIC SEARCH**.

E. M. Little  
Dryden, New York
