You are invited to become part of one of humanity's most challenging enterprises: help us chart the unknown beyond our native planetary system. Join us as we aid scientists in their efforts to detect and study planetary systems beyond our own.

Since a little support can make a big difference in this fledgling scientific effort, we have formed a Foundation for the collection and dispersal of these badly needed funds: the funds will be granted to scientists now developing the first instrumentation capable of detecting planetary systems of other stars. Our combined contributions can make a significant difference if applied carefully, for example to supply a badly needed instrument or to help prepare a proposal to a national funding agency.

Send your contribution or request for further information to the Extrasolar Planetary Foundation, Observatory Station, Pittsburgh, Pennsylvania 15214.

GRADUATE RESEARCH ASSISTANSHIP
in
The Search for
Extraterrestrial Intelligence
at
The Ohio State University
Radio Observatory
(Site of one of the world's most extensive
observational SETI research programs).

We have a position beginning in Summer
or Fall 1981 for a graduate student in
Electrical Engineering or Astronomy. Must
have a B.S. in Electrical Engineering,
Astronomy, Physics or a related field. Must
have PRACTICAL experience in the use and
repair of electronic equipment, and must
have an automobile to commute from the
campus to the observatory (20 miles).
The successful candidate will be
responsible for the design, maintenance
and operation of radio telescope in-
strumentation used in our full-time SETI
program.
Compensation includes tuition plus
stipend.
Send resume and references to:
Dr. Robert S. Dixon
Ohio State University Radio
Observatory
2015 Neil Ave.
Columbus, Ohio 43210
(614)422-6789
