You are invited to become part of one of humanity's most challenging enterprises: help us chart the unknown beyond our native planetary system. Join us as we aid scientists in their efforts to detect and study planetary systems beyond our own.

Since a little support can make a big difference in this fledgling scientific effort, we have formed a Foundation for the collection and dispersal of these badly needed funds: the funds will be granted to scientists now developing the first instrumentation capable of detecting planetary systems of other stars. Our combined contributions can make a significant difference if applied carefully, for example to supply a badly needed instrument or to help prepare a proposal to a national funding agency.

Send your contribution or request for further information to the Extrasolar Planetary Foundation, Observatory Station, Pittsburgh, Pennsylvania 15214.

I DO NOT KNOW WHAT I MAY APPEAR TO the world; but to myself I seem to have been only like a boy playing on the seashore, and diverting myself in finding a prettier shell than ordinary, whilst the great ocean of truth lay all undiscovered before me. -SIR ISAAC NEWTON
